

## Cleveland Metroparks

Congratulations to the Cleveland Metroparks on their 2006 award of a \$200,000 United States Environmental Protection Agency (EPA) Brownfield Assessment Grant. Partners Environmental was pleased to author this application for the Cleveland Metroparks. It was the third successful application for U.S. EPA Brownfield Grants written by Partners. The Cleveland Metroparks hopes to use this grant to assess potentially contaminated properties as they look to expand the canal trail north, through the City of Cleveland's historic industrial valley or into other urban areas. We look forward to continuing our relationship with the Cleveland Metroparks as they proceed with their mission.
