

Dan B. Brown (CP 127 and President of Partners Environmental) is among a select group of Certified Professionals (CPs) asked by the Ohio Environmental Protection Agency (EPA) to conduct training for newly appointed Certified Professionals under Ohio's Voluntary Action Program (VAP). New rules developed by the Ohio EPA require that new Certified Professionals and those that have not recently written a No Further Action (NFA) Letter attend an initial eight-hour training session. In conjunction with the Ohio EPA, Mr. Brown has developed the Phase II Property Assessment portion of the training. The Ohio EPA will be filming the training in March 2006 and subsequently utilize the training video for future training sessions. To learn more about Ohio's VAP, please contact Mr. Brown.
